ABHINAV SINGH

Python | SQL | Java | ML/AI | Call Planning | Pharma
Bengaluru, Karnataka, India

Summary

Results-driven Data Analyst with 4+ years of experience in data analytics, machine learning, and AI-driven solutions, currently working as an Associate at Axtia, India. Skilled in Python, SQL, PyTorch, NumPy, Databricks, statistical analysis, predictive modeling, and data visualization, with hands-on experience in building scalable, data-driven solutions to solve complex real-world business problems. I have worked extensively on data processing, automation, business analytics, and developing analytical frameworks that support strategic decision-making and operational efficiency. I hold an M.Tech in Software Engineering (2022), where my thesis focused on Semantic Web 3.0 and intelligent data systems. Throughout my career, I have worked across multiple technologies and analytical domains, including machine learning pipelines, data engineering workflows, exploratory data analysis (EDA), feature engineering, model optimization, and AI-powered applications. I have practical exposure to working with large datasets, deriving actionable insights, and implementing end-to-end analytical solutions that align with business objectives. My growing interest lies in Artificial Intelligence, Generative AI, Vector Databases, Vector Embeddings, RAG (Retrieval-Augmented Generation), Large Language Models (LLMs), AI Agents, and modern AI application architectures. I actively explore emerging technologies and continuously work on improving my understanding of scalable AI systems, intelligent automation, and real-world AI implementations. I enjoy solving complex problems using Algorithms & Data Structures (DSA) and leveraging analytical thinking to transform raw data into meaningful insights that drive measurable impact. I am passionate about continuous learning, innovation, and building solutions that combine technology with business value. Beyond work, I enjoy singing, collaborating with tech communities, and connecting with professionals who share a passion for innovation, knowledge sharing, and impactful problem-solving. I am open to opportunities in Data Science, Machine Learning, AI Engineering, and related domains, and I am comfortable working

across diverse technology stacks focused on solving challenging analytical and business problems.

Experience

Axtria - Ingenious Insights

3 years 11 months

Associate

May 2024 - Present (2 years 1 month)

Bengaluru

Engineered ML-driven response curve models to replace legacy rule-based systems, increasing targeting precision by

35% for pharmaceutical outreach.

Developed an LLM-powered RAG pipeline for automated query resolution, reducing response latency by 90%

through fine-tuned models.

Architected a scalable data system on Databricks for 500K+ physician records, improving processing speed by

50% and reducing storage costs by 40%.

Applied K-Prototypes clustering and Random Forest to segment healthcare providers based on complex multi-dimensional datasets

Analyst

July 2022 - June 2024 (2 years)

India

Automated end-to-end call planning by migrating Excel workflows to SQL, reducing execution time from 8 hours

to 45 minutes with 95% data quality improvement.

Implemented Greedy Optimization algorithms to maximize physician coverage, resulting in a 25% increase in

outreach efficiency.

Spearheaded cross-functional teams to manage high-stakes client deliverables, ensuring error-free deployment of

targeting strategies.

Education

Bosscoder Academy

Data Science and Machine Learning, Data Processing · (January 2025 - January 2026)

Indian Institute Of Information Technology

Master of Technology - MTech, Information Technology · (2020 - 2022)

Madan Mohan Malaviya University of Technology

Bachelor of Technology - BTech, bachelor of technology · (2016 - 2020)
